

Precision Amplifiers Low Noise RRIO Zero Drift Dual OpAmp

Manufacturers	Analog Devices, Inc
Package/Case	MSOP-8
Product Type	Amplifier ICs
RoHS	Rohs
Lifecycle

General Description

The ADA4528-2ARMZ-R7 is a specific electronic component, which appears to be a dual precision operational amplifier manufactured by Analog Devices. It is designed for applications that require high precision, low noise, and low distortion amplification.

Features

- Dual operational amplifier
- Low input offset voltage for precise amplification
- Low input bias current for minimal signal distortion
- Low noise and low distortion for accurate signal reproduction
- High open-loop gain for reliable performance
- Wide supply voltage range for flexibility

Application

- Precision instrumentation and measurement equipment
- Data acquisition systems
- Sensor amplification and signal conditioning
- Active filters and equalizers
- Audio signal processing
- Medical and scientific instruments
