General Description

ADM233LJN is a type of IC (integrated circuit) that belongs to the family of RS-232 Interface ICs. It is a dual-channel RS-232 driver/receiver that operates with a single 5V power supply. This IC is designed to interface between digital circuits and serial communication lines in a variety of applications, including computers, point-of-sale terminals, modems, and other data communication equipment.

Features

- Dual-channel RS-232 driver/receiver
- Single 5V power supply operation
- ESD protection for RS-232 I/O pins
- Low power consumption (typically 8 mA)
- Internal charge pump for voltage conversion
- Operates over a wide temperature range (-40°C to 85°C)

Application

- Serial communication interfaces for computers and peripherals
- Data communication equipment
- Point-of-sale terminals
- Industrial control systems
- Modems and other communication devices
