General Description

M27C4001-12F1 is a type of EPROM (Erasable Programmable Read-Only Memory) chip manufactured by STMicroelectronics.

Features

It has a capacity of 4 Megabits (or 512 Kilobytes) of memory

Access time of 120 ns (nanoseconds)

Low power consumption

Can be programmed and erased electrically

DIP (Dual in-line package) packaging

Application

Used in various embedded systems, such as gaming machines, industrial controllers, and automotive applications

Can be used for firmware storage in electronic devices

Can also be used in communication systems, such as routers and modems
