General Description

M29W800DB70N6 is a flash memory chip manufactured by STMicroelectronics. Here are its features:

Features

- It has a capacity of 8 megabits (1 megabyte) of memory.
- It operates with a single 2.7V to 3.6V power supply.
- It uses NOR flash memory technology, which allows for fast read access times.
- It has a 70ns access time.
- It is housed in a 48-pin TSOP (Thin Small Outline Package) package.

Application

- Embedded systems
- Consumer electronics
- Automotive systems
- Industrial equipment
- Medical devices
