General Description

M27C256B-90F6 is a specific type of EPROM (Erasable Programmable Read-Only Memory) IC (integrated circuit) manufactured by STMicroelectronics.

Features

- It has a capacity of 256 kilobits (32 kilobytes) of non-volatile memory.
- It operates with a supply voltage range of 4.5V to 5.5V.
- It has a maximum access time of 90 ns.
- It has a 28-pin DIP (Dual Inline Package) package type.
- It is electrically erasable and reprogrammable.

Application

- Firmware storage in electronic devices.
- Calibration data storage in measurement instruments.
- Configuration storage in networking equipment.
- BIOS (Basic Input/Output System) storage in computer motherboards.
