## General Description

ST232CN is a popular IC (integrated circuit) chip that is commonly used in serial communication applications. It is manufactured by STMicroelectronics, a leading semiconductor company based in Europe.

### Features

- Dual RS232 transmitters/receivers
- Supports data rates up to 120 kbps
- Low power consumption
- Operates from a single +5V power supply
- Available in a 16-pin SOIC package

### Application

- Interface between computers or microcontrollers and RS232 serial devices such as modems, printers, and sensors
- Industrial control systems
- Embedded systems
- Point-of-sale terminals
- Data acquisition systems
