General Description

XCF02SV020C is a specific type of non-volatile flash memory IC (integrated circuit) manufactured by Xilinx. It belongs to the XCF02S series and has a capacity of 2 megabits (256 kilobytes) with a 3V voltage supply.

Features

- High-speed programming and erase operations
- Low power consumption
- Security and anti-tamper features
- Endurance of at least 20,000 erase/program cycles
- RoHS compliant

Application

- Aerospace and defense systems
- Industrial control and automation
- Automotive electronics
- Medical devices
- Consumer electronics
- Telecommunications equipment
