## General Description

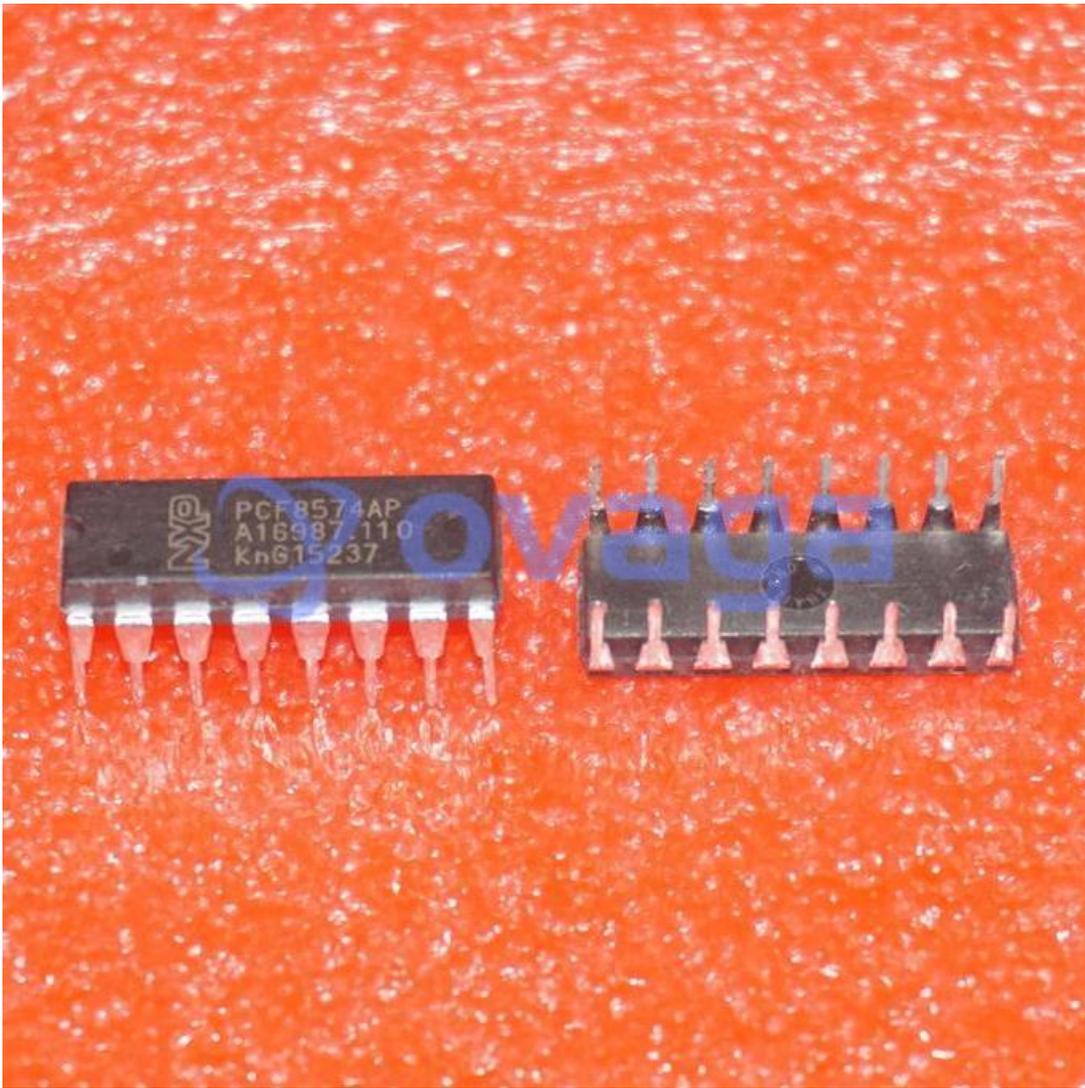

PCF8574AP is an 8-bit I/O expander for the two-line bidirectional bus (I2C) designed by NXP Semiconductors.

### Features

- 8-bit remote I/O ports with bi-directional data transmission via I2C bus
- Compatible with most microcontrollers
- Low standby current consumption of 10  $\mu$ A typical
- Operating voltage range of 2.5 V to 6 V
- Active LOW open-drain interrupt output
- Internal power-on reset

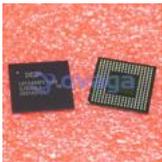

### Application

- Industrial control and automation systems
- Home automation and security systems
- Instrumentation and measurement systems
- Automotive electronics
- Medical equipment
