## General Description

E28F016SV-70 is a flash memory chip manufactured by Intel Corporation. Here are some of its features:

### Features

Capacity: 16 megabits (2 megabytes)

Organization: 2 M x 8 bits

Voltage: 5 volts

Access time: 70 nanoseconds

Interface: parallel interface

### Application

Storing firmware and other code in digital cameras, printers, and other embedded systems

Storing data in industrial control systems and other applications that require non-volatile memory

Storing configuration data in networking and telecommunications equipment
