

Precision Amplifiers Quad Low Offset-Pwr Mono 3nA Max

Manufacturers	Analog Devices, Inc
Package/Case	14-CDIP
Product Type	Amplifier ICs
RoHS	
Lifecycle

General Description

The OP400HS is a high-speed, low-power op-amp that offers high bandwidth, low input bias current, and low supply current. It is designed to provide fast and accurate amplification in applications where high-speed performance and low power consumption are important.

Features

- High-speed, low-power operational amplifier IC
- High bandwidth
- Low input bias current
- Low supply current
- Wide supply voltage range
- Rail-to-rail input and output capability

Application

- Communication systems
- Data acquisition systems
- Test and measurement equipment
- Instrumentation amplifiers
- Active filters
- Signal conditioning circuits
- Audio amplifiers
- Precision voltage and current amplification
