

IRFB3307ZPBF

Data Sheet

HEXFET Power MOSFET

Manufacturers <u>Infineon Technologies Corporation</u>

Package/Case TO-220AB

Product Type Transistors

RoHS Green

Lifecycle

RFO

General Description

The StrongIRFETTM power MOSFET family is optimized for low $R_{DS(on)}$ and high current capability. The devices are ideal for low frequency applications requiring performance and ruggedness. The comprehensive portfolio addresses a broad range of applications including DC motors, battery management systems, inverters, and DC-DC converters.

Industry standard through-hole power package

High-current rating

Product qualification according to JEDEC standard

Silicon optimized for applications switching below <100 kHz

Softer body-diode compared to previous silicon generation

Wide portfolio available

Standard pinout allows for drop in replacement

High-current carrying capability package

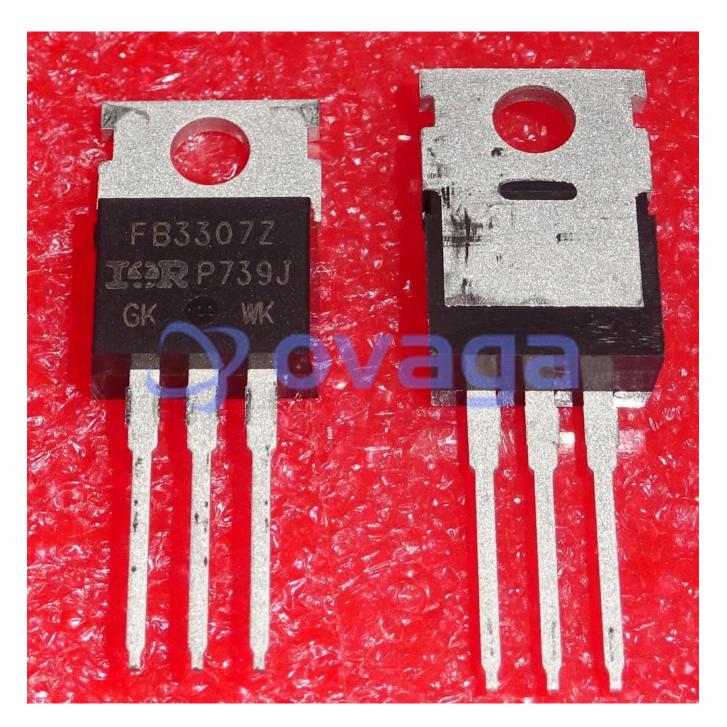

Industry standard qualification level

High performance in low frequency applications

Increased power density

Provides designers flexibility in selecting the most optimal device for their application

Battery powered applications	
Power tools	
DC motor drives	
Light Electric Vehicles (LEV)	
SMPS	
Features	Application
Industry standard through-hole power package	Battery powered applications
High-current rating	Power tools
Product qualification according to JEDEC standard	DC motor drives
Silicon optimized for applications switching below <100 kHz	Light Electric Vehicles (LEV)
Softer body-diode compared to previous silicon generation	SMPS
Wide portfolio available	
Standard pinout allows for drop in replacement	
High-current carrying capability package	
Industry standard qualification level	
High performance in low frequency applications	
Increased power density	
Provides designers flexibility in selecting the most optimal device for their application
