

Analog Multiplexer Single 8:1 16-Pin TSSOP Tube

Manufacturers	Analog Devices, Inc
Package/Case	TSSOP-16
Product Type	Interface ICs
RoHS	
Lifecycle

General Description

ADG408BRU is a specific electronic component known as an analog switch. It is manufactured by Analog Devices Inc. and is a part of their ADG408 series of high-performance CMOS switches.

Features

- 8 independent single-pole, single-throw (SPST) switches
- Wide operating voltage range of 4.5V to 16V
- Low on-resistance of 60 ohms typical at 15V supply
- Fast switching times of less than 150ns
- Low power consumption

Application

- Audio and video signal switching
- Precision signal switching in test and measurement equipment
- Multiplexing and demultiplexing in communication systems
- Battery-powered systems
- Industrial control and automation
