## General Description

ACS108-6SN is a type of solid-state relay (SSR) manufactured by STMicroelectronics. It is a single-pole, normally open (SPNO) SSR with a maximum load voltage of 600V and a maximum load current of 8A. It has a zero-crossing turn-on and turn-off feature, which helps reduce switching noise and prolongs the life of the relay.

## Features

Low input current: 5mA

Low input control voltage: 1.5V to 1.8V

High immunity to noise and transient voltages

High reliability and long lifespan

RoHS compliant
